Océ CS234

Wide format color printing for indoors and outdoors

Detailed line work or photo-quality prints? Up to now, you needed multiple printers. But the new Océ CS2344 handles all your wide format work equally efficiently, and with equally excellent results. Thanks to its innovative 8-color pigment ink technology, this versatile, easy-to-use printer handles all kinds of applications: from technical drawings to posters, signs and billboards, both indoor and outdoor.

That makes the Océ CS2344 the ideal printer for users who want to broaden their colorful horizons. Including on the one hand architects, engineering firms and local government departments, with printing requirements from technical drawings to long-lasting outdoor signage. And on the other hand commercial printshops that want to handle every job their customers come up with, on just a single printer.

Wide format color printing for indoors and outdoors

Outstanding results: line drawings to outdoor posters

With the Océ CS2344, you have one printer that does it all: from detailed line drawings with color content, right through to full-color display graphics. The high resolution of 2400 x 1200 dpi ensures sharp reproduction of fine line work, so the Océ CS2344 is the ideal way to add color to technical drawings. This versatile 8-color printer also gives outstanding image quality on all kinds of color-enhanced and full-color prints: right up to photo-quality posters, billboards, customer presentations and even outdoor signage.

Easy to use: fast results without trial & error

Ease of use is another key benefit of the Océ CS2344. Operation is clear and intuitive, with a zero learning curve that makes everyone productive right from the first print. That means fast results with no costly, time-wasting trial & error. Your prints are right first time, every time, enabling you to deliver quality, productive results on every job.

“We’re using more and more color in our drawings so we need a color printer that will give us equally excellent results on both graphic and detailed technical work.”

CAD department manager

Wide media choice: quality that's right every time

Océ offers you a virtually unlimited media choice for the versatile Océ CS2344: from draft, standard and premium paper grades, through glossy and photo papers, to films and specialty media such as canvas, linen, vinyl and Tyvek®. The Océ media profiles ensure perfect matching of inks, media and machine, for consistent, right-first-time results. You can print widths of up to 44 inches (112 cm), both roll-fed and cutsheet. Media rolls are quick and easy to change, for almost uninterrupted productivity. And with roll capacities of up to 120 meters, you have plenty of capacity for long, unattended print runs.

“Now we can produce our wide format plans and drawings with excellent detail resolution, as well as renderings and artists’ impressions, all on the same color printer.”

Broaden your colorful horizons

New 8-color pigment ink technology: high light-fastness

The Océ CS2344's unique new 8-color pigment ink technology with 100% water-based inks ensures outstanding results. High light-fastness allows you to produce outdoor-proof prints with multi-year durability. Another benefit of the pigment ink technology is that it is completely solvent-free, which results in a healthier working environment.

Double printhead design: for speed and productivity

The double integrated printheads are one of the reasons for the Océ CS2344's printing performance. This unique printing technology produces the perfect mix of speed, quality and productivity across all types of printing work. Further maximizing your output are the high print speed – less than 2 minutes per full-color A0 print – and the bulk ink system with optional 700 ml ink tanks.

Top value: for cost-effective printing results

The Océ CS2344 is a top-value printer for cost-effective printing results. To start with, its high versatility means you only need one printer for all kinds of full-color wide format print orders. Running costs are further reduced by the long-lasting printheads for extended periods of intensive operation. And by the draft print mode, which significantly reduces ink usage for many everyday print jobs. The bottom line is an excellent return on investment, even at only a few prints per day.

“Whatever kind of wide format jobs customers come up with, we can handle them: from technical drawings to photo-quality posters, for both indoor and outdoor use.”

Printing for Professionals

Océ helps the people who make our world. Companies everywhere use Océ technical documentation systems in manufacturing, architecture, engineering and construction. Each week, high speed Océ printing systems produce millions of transaction documents such as bank statements and utility bills. And in offices around the world, people use Océ professional document systems to keep the wheels of business and government turning. Océ is also at work in publishing on demand, newspaper production, document management outsourcing and wide format colour for spectacular display graphics. It all helps our professional customers go 'Beyond the Ordinary' in printing and document management.
